3. Investment Category

The investment objective requested is: (Review our investment results carefully and check one of the following)

Short Term Fund (Less than 3 years) – The primary investment objective of this Fund is stability of principal. This Fund is appropriate for non-endowed funds, or other situations where funds can be withdrawn with little or no advance notice, and/or situations where only minimal fluctuations to the principal can be tolerated. Agencies and donors with time horizons under three years should consider this strategy.

Medium Term Fund (3-5 Years) – The primary investment objective of this Fund is to provide payouts with moderate year to year volatility. This Fund may experience some reduction of purchasing power over time due to inflation. This Fund is appropriate for endowed funds that require minimal, or no, nominal growth (before inflation) after payouts, or non-endowed funds that have a time horizon that is between three and five years. This Fund will most likely experience moderate fluctuations to principal.

Long Term Fund (5+ Years) – The primary investment objective of this Fund is preservation of purchasing. Power to provide a relatively stable, inflation adjusted, annual payout to support grant-making or other donor missions. This Fund is appropriate for endowed funds or non-endowed funds with time horizons beyond five years. There will be some inevitable volatility in principal value from this strategy, but it may offer the potential for a sustainable payout plus inflation protection, understanding that this may result in a less stable payout from year to year.

Long Term Environmental, Social & Governance (ESG) Fund (5+ Years) – The primary investment objective of this Fund is preservation of purchasing. Power to provide a relatively stable, inflation adjusted, annual payout to support grant-making or other donor missions while considering environmental, social and governance criteria in selecting companies in the portfolio. This Fund is appropriate for endowed funds or non-endowed funds with time horizons beyond five years. There will be some inevitable volatility in principal value from this strategy, but it may offer the potential for a sustainable payout plus inflation protection, understanding that this may result in a less stable payout from year to year.
